Creative photography course - introduction

VSS's fully accredited part time 8 week photography course leads to a part qualification (SAQA US Certificate), and credits towards a National Certificate: Photography, should you wish to pursue it and turn this into a career.

Photography is but one of the elements of effective visual communication, but it certainly has the most definitive impact on the bigger picture! Making an image is, however, much more than setting your DSLR on "P" and pressing the button...

Cameras and processes have changed radically,
however, photography has not changed!

The science and technique of photography is not something one knows - it is something one learns. Creative photography does not fall from the sky - one has to develop one's imagination, learn composition and proper manipulation of images to achieve the effect that inspires awe and admiration.

This course endeavors to teach you the technical skills, as well as create opportunities for application of these skills in a multitude of genres, including available light, nature, wildlife, photo journalism, studio photography and video. That is why we do field trips!

Due to potential students having to travel quite a distance for classes we have scheduled this course over 8 weeks apart from final presentation which will be an one-man exhibition:

- 2-3 hour lecture on a week day and time determined by students at first meeting.
- Morning theory followed by a practical photography session on Sat. Sat. class can be repeated/converted to Sunday.

Dates can change to the need of students but must be negotiated with group. Further self-study (notional) hours are compulsory for successful completion of the SAQA US Certificate. Should classes be missed, classes can be repeated/presented mid January 2018.

On successful completion and submission of your Portfolio of Evidence, you will receive the following Competency Certificates:
SAQA US 336114: Use a still camera to capture a range of photographic images
SAQA US 336096: Plan and organise logistical requirements for a photographic brief / assignment.

Students who do not wish to submit a Portfolio of Evidence, will receive a VSS Certificate on submission of a successful Photography Portfolio.

Accreditation no: ACC/2014/07/3059

Practical: Present and exhibit portfolio at end of course Exhibition at VSS.

certificate - intensive photography course - curriculum

ESSENTIAL EMBEDDED KNOWLEDGE (EEK):

1. Light sensitive (sensitometry) within the use of a still photographic camera.
2. Lighting techniques for capturing photographic images.
3. Applicable theory of camera anatomy and lenses when capturing still photographic images.
4. Photographic and visual elements and principles.
5. History of photography as an art form when capturing still photographic images.
6. Digital theory when working within a digital photographic environment.
7. Applicable software application for digital production environment.
8. Photographic workflow processes within the:
 - Recording, organizing and filing of documents and information.
 - production of digital photographic images.
9. Digital imaging procedures to capture photographic images in a digital environment.
10. Digital printing technology processes within the production of digital photographic images.
11. Recording, organising and filing of documents and information.
12. Relevant measuring, scientific and chemical procedures when
 - capturing photographic images.
 - planning and organising logistical requirements for a photographic brief.
13. Latest trends, movements and styles for organising logistical requirements of a photographic shoot.
14. Housekeeping and safety procedures within the context of:
 - using still cameras to capture photographic images.
 - planning and organising logistical requirements for a photographic brief.
15. Communication methods:
 - to communicate when capturing photographic images.
 - to communicate the planning and organising logistical requirements for a photographic brief.

UNIT STANDARD ID 336114: USE A STILL CAMERA TO CAPTURE A RANGE OF PHOTOGRAPHIC IMAGES

PURPOSE OF UNIT STANDARD: To enable a learner to be able to capture photographic images with a still camera.

NQF LEVEL: 4

CREDITS: 15

UNIT STANDARD ID 336096: Plan and organise logistical requirements for a photographic brief / assignment

PURPOSE OF UNIT STANDARD:

The purpose of the learning is to enable a learner to plan and organise logistical requirements for a photographic shoot in either an analogue or a digital photographic environment.

These unit standards contributes to the competence of those learners who want to pursue a career in the Photographic sector, and contribute to greater levels of production and quality in this sector. The unit encompasses the development of a schedule for a photographic shoot, planning and organisation needed, and documentation of all logistical arrangements according to a photographic brief determined by a client.

Credited learners are capable of:

- Analysing aims and outcomes of a photographic brief to identify logistical requirements.
- Planning and organising the photographic work schedule according to identified criteria.
- Presenting, evaluating and adjusting a work schedule to plan and organise logistical requirements of a photographic brief.
- Documenting and filing logistical requirements for safe keeping.

PRINCIPLES OF ASSESSMENT: Validity, authenticity, currentness, sufficiency and the process must be fair and consistent.
